

Do not change New Jersey law about Do Not Call program. we still get a few call but they are now tolerable. Before there were so many many and most of the people were extremely nasty and rude when calling. Some of the calls were donwe by computers and even when you hung up it still was on the line tying up your line. we couldn't call out or get incoming call until that computer was done. Call came in well after 8pm. And none of these people ever took no for an answer.

I like the program as is. If I want to buy something I will get in contact with the company, they don't have to call me. In fact I will not buy or contribute to anyone or anything that's calls me. We have an unlisted number so no one should have been calling in the first place. If you are really for the people DON'T change the NJ program.
